

## OPEN HOUSE

22.04 - 03.05

We thank the past, celebrate the present and build the future

# OPEN HOUSE 22.04-03.05

Danobat opens its doors, an exclusive event to immerse yourself in our environment and experience our latest developments. At this meeting, we bring together leading professionals like you to discuss about the developments that have characterized Danobat for seven decades.

#### Discover our solutions for bearings

Along the route, you will be able to experience a real assembly environment where you will discover different projects in the bearings industry. In this meeting, you will experience a unique opportunity to get to know and discuss about cutting-edge technology with our experts.

You will get to know in depth the solutions for grinding all kind of bearings rings, in particular, ball, cylindrical, taper, spherical and plain bearings.

#### Celebrate with us

This year is not just any year, we are celebrating our 70<sup>th</sup> anniversary and the opening of new facilities. We invite you to be part of this unique experience, where technology and collaboration merge to open up new possibilities in the bearings' world

Are you going to miss it? Contact us!

#### VERTICAL GRINDING MACHINE WITH CROSS SLIDE CONFIGURATION

The key to this machine lies in the option of simultaneously running different machining operations, maximising your productivity.

Up to 2000 mm | 78.74 in maximum swing and 500 mm | 19.69 in ring width.

Designed for spherical roller bearing inner and outer rings.

Assemblied (%)

Up to 2500 mm | 98.43 in maximum swing and 500 mm | 19.69 in ring width.

Designed for taper and cylindrical roller bearing inner and outer rings

Assemblied (%)

Up to 4500 mm | 177.17 in maximum swing and 500 mm | 19.69 in ring width.

Designed for taper and cylindrical roller bearing inner and outer rings.

Assemblied (%)
